5. 6 magnet edges with power cable and signal cable

6. 18 wireless magnetic edge

7. 18 Flight Cases for LED dance floors

8. 1 extra flight case for accessories

But HOW to light up dance floor when you are in the events?

Let's move on step by step.

This is the complete Installation Drawing for 20x20ft light up floor tiles
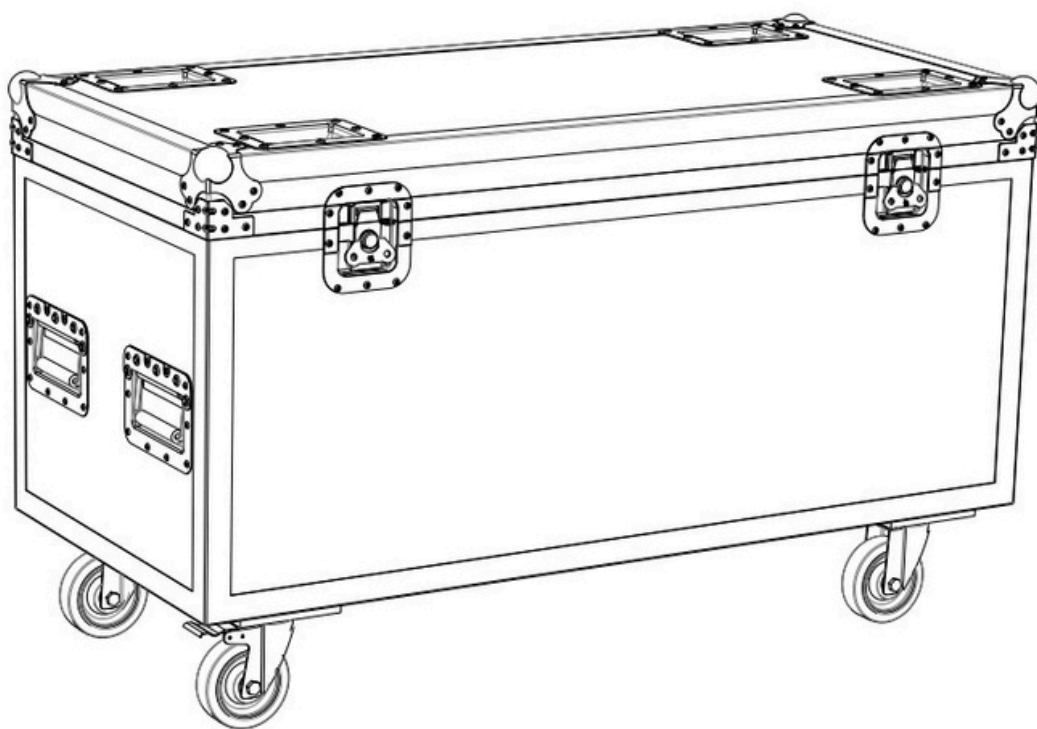

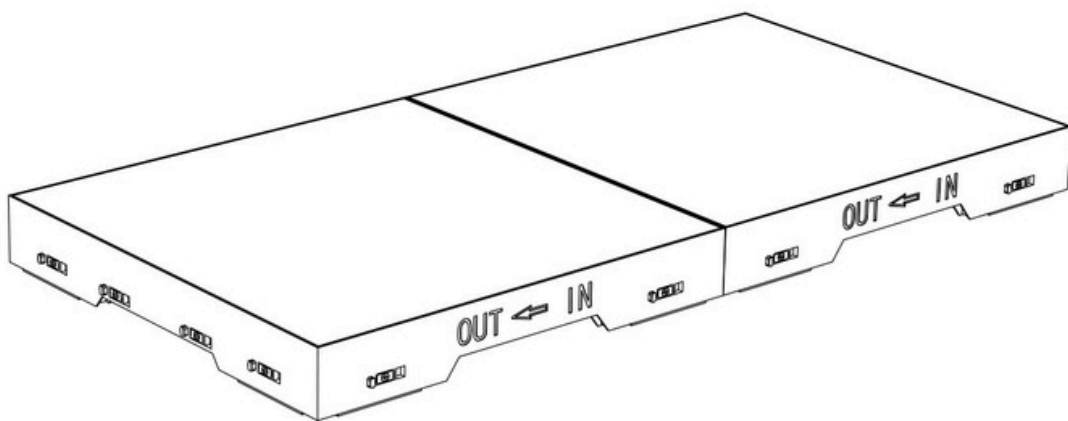

First, pick the led dance floor out from the flight case one by one.
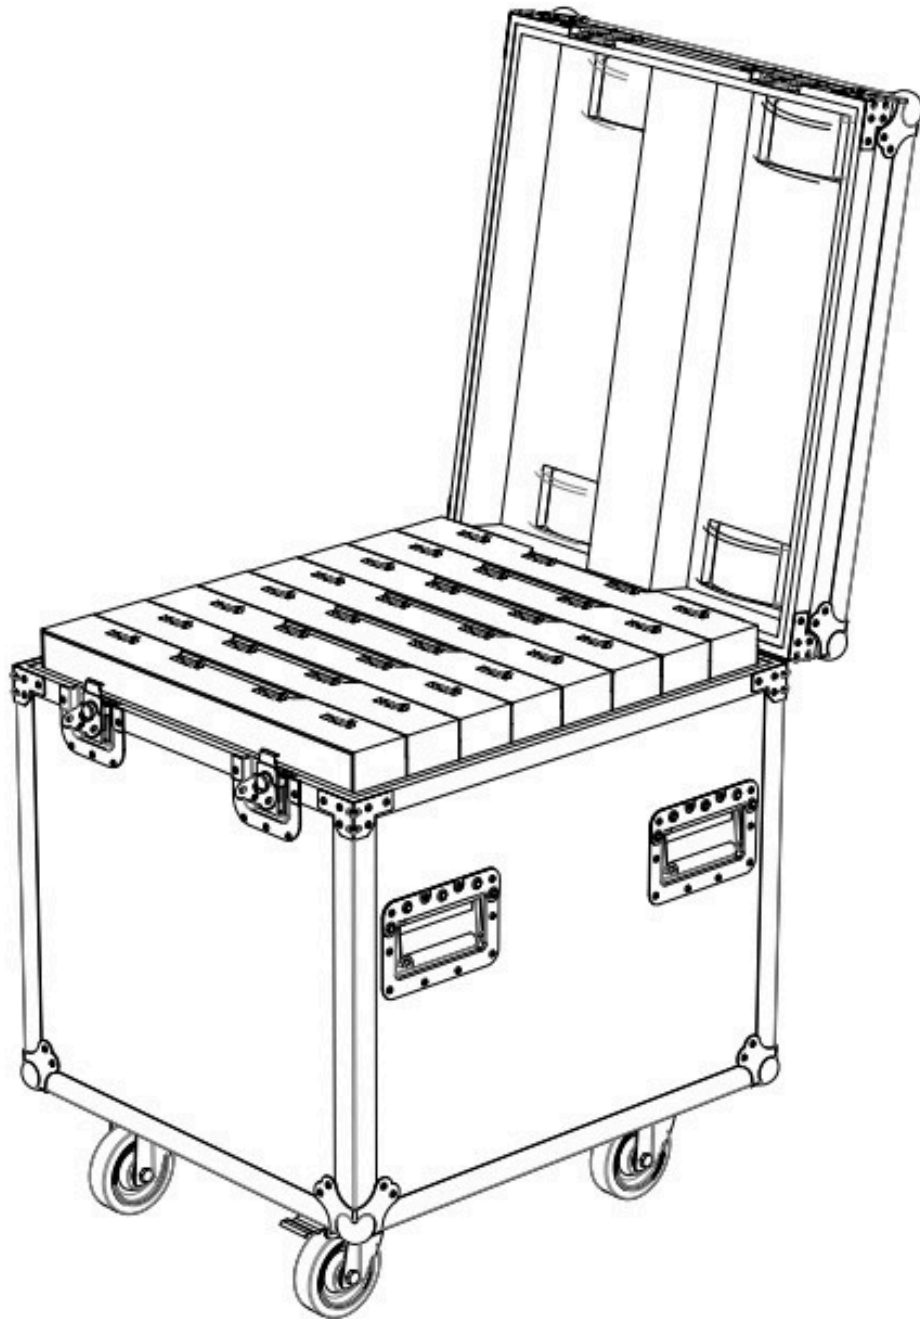

Second, Install the first two rows. There is a arrow beside the light up

dance floor, make sure that all dance floors are in the same direction.

When you hear "CHUCK" from the magnet connector, you set up the

dance floor perfectly.

Third, connect the magnetic edge with power cable and controller, make sure that the "IN" side is the starting point where the cables need to be connected. (Silver connector for controller and blue connector for power supply)
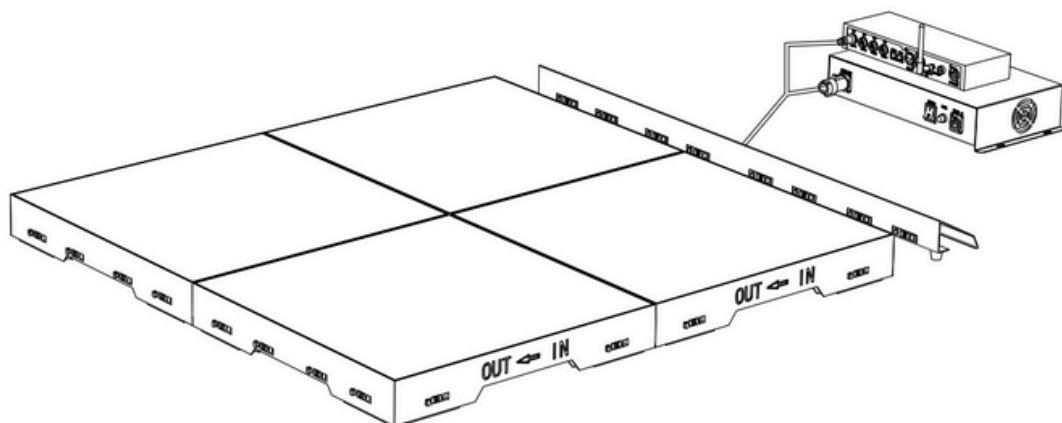

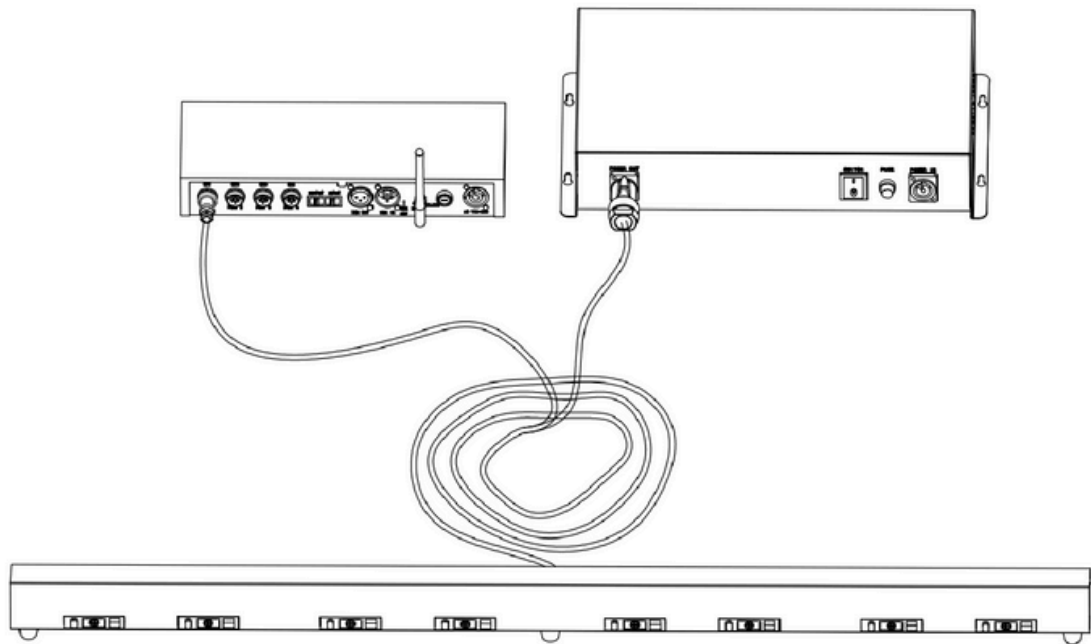

Fourth, Connect the cables to the power supply and controller relatively. (Make sure that the lines on the edge connect ports 1, 2, 3, 4 in order)
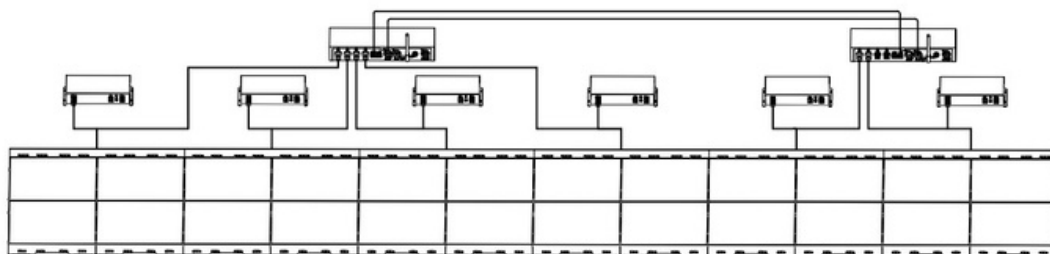

Fifth, set up the led dance floor based on the complete drawing, and connect the wireless magnet edges for the other three sides.
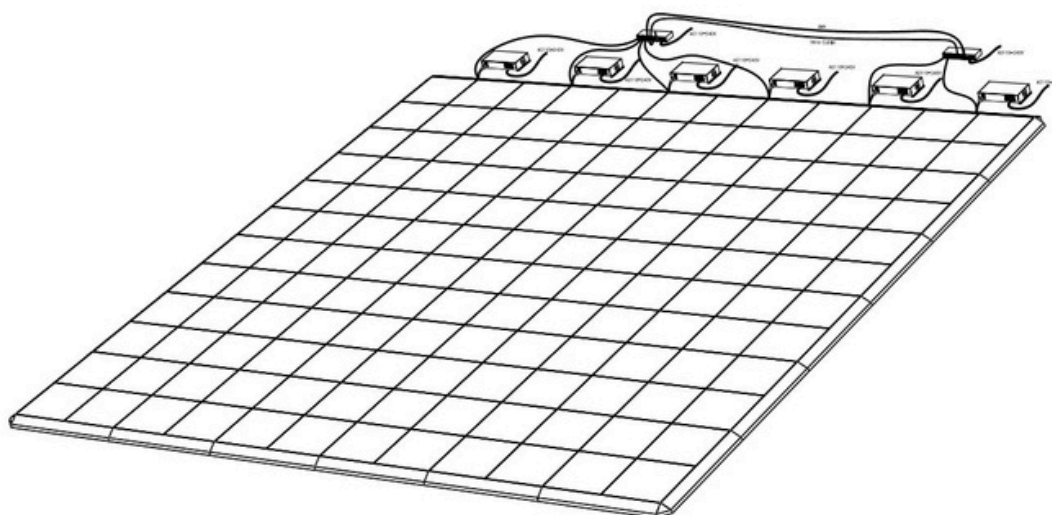

安装视频

Last but not least, fix the controllers and test the effects for these 3D LED dance floor. **(DO NOT KEEP BRIGHT WHITE LIGHT FOR MORE THAN 30 MINUTES)**
